Week - 1 Reactjs handson lab - 1

Objective : Create a React application named myfirstreact and display
"Welcome to the first session of React"

Installation Verification :

```
Last login: Sun Jun 21 14:35:34 on ttys000
aksharabhargava@Aksharas-MacBook ~ % node -v
v24.17.0
aksharabhargava@Aksharas-MacBook ~ % npm -v
11.13.0
aksharabhargava@Aksharas-MacBook ~ %
```

Project Creation :

```

Last login: Sun Jun 21 14:35:34 on tty000
aksharabhargava@Aksharas-MacBook ~ % node -v
v24.17.0
aksharabhargava@Aksharas-MacBook ~ % npm -v
11.13.0
aksharabhargava@Aksharas-MacBook ~ % npx create-react-app myfirstreact
Need to install the following packages:
create-react-app@5.1.0
Ok to proceed? (y) y

Creating a new React app in /Users/aksharabhargava/myfirstreact.

Installing packages. This might take a couple of minutes.
Installing react, react-dom, and react-scripts with cra-template...

added 1300 packages in 41s

271 packages are looking for funding
  run `npm fund` for details

Initialized a git repository.

Installing template dependencies using npm...

added 18 packages, and removed 1 package in 3s

270 packages are looking for funding
  run `npm fund` for details
Removing template package using npm...

removed 1 package, and audited 1317 packages in 5s

42 vulnerabilities (4 low, 27 moderate, 11 high)

To address issues that do not require attention, run:
  npm audit fix

To address all issues (including breaking changes), run:
  npm audit fix --force

Run `npm audit` for details.

Created git commit.

Success! Created myfirstreact at /Users/aksharabhargava/myfirstreact
Inside that directory, you can run several commands:

  npm start
    Starts the development server.

  npm run build
    Bundles the app into static files for production.

```

Source Code :

```

Compiled successfully!

You can now view myfirstreact in the browser.

Local:      http://localhost:3000
On Your Network:  http://192.168.29.220:3000

Note that the development build is not optimized.
To create a production build, use npm run build.

webpack compiled successfully

```

Output :

```
src > JS App.js > ...
1  function App() {
2    return (
3      <div>
4        <h1>Welcome to the first session of React</h1>
5      </div>
6    );
7  }
8
9  export default App;
10
```

Welcome to the first session of React

Explanation :

1. Installed Node.js and npm.
2. Created a React application using create-react-app.
3. Modified App.js to display a custom heading.
4. Executed the application using npm start.
5. Verified the output in the browser.

Result :

The React application was created successfully and displayed

"Welcome to the first session of React".
