Run 'npm audit' for details.
Created git commit.
Success! Created scorecalculatorapp at /Users/aksharabhargava/Desktop/scorecalculatorapp
Inside that directory, you can run several commands:

  npm start
    Starts the development server.

  npm run build
    Bundles the app into static files for production.

  npm test
    Starts the test runner.

  npm run eject
    Removes this tool and copies build dependencies, configuration files
    and scripts into the app directory. If you do this, you can't go back!

We suggest that you begin by typing:

  cd scorecalculatorapp
  npm start

Happy hacking!
aksharabhargava@Aksharas-MacBook Desktop % cd scorecalculatorapp
```

[CalculateScore.js](#)

```
import "../Stylesheets/mystyle.css";
```

```
function CalculateScore(props) {
```

```
let average = props.total / props.goal;
```

```
return (
```

```
  <div className="box">
```

```
    <h1>Student Details</h1>
```

```
    <p>
```

```
      <b>Name :</b> {props.name}
```

```
    </p>
```

```
    <p>
```

```
      <b>School :</b> {props.school}
```

```
    </p>
```

```
    <p>
```

```
      <b>Total Marks :</b> {props.total}
```

```
    </p>
```

```
    <p>
```

```
      <b>Goal :</b> {props.goal}
```

```
    </p>
```

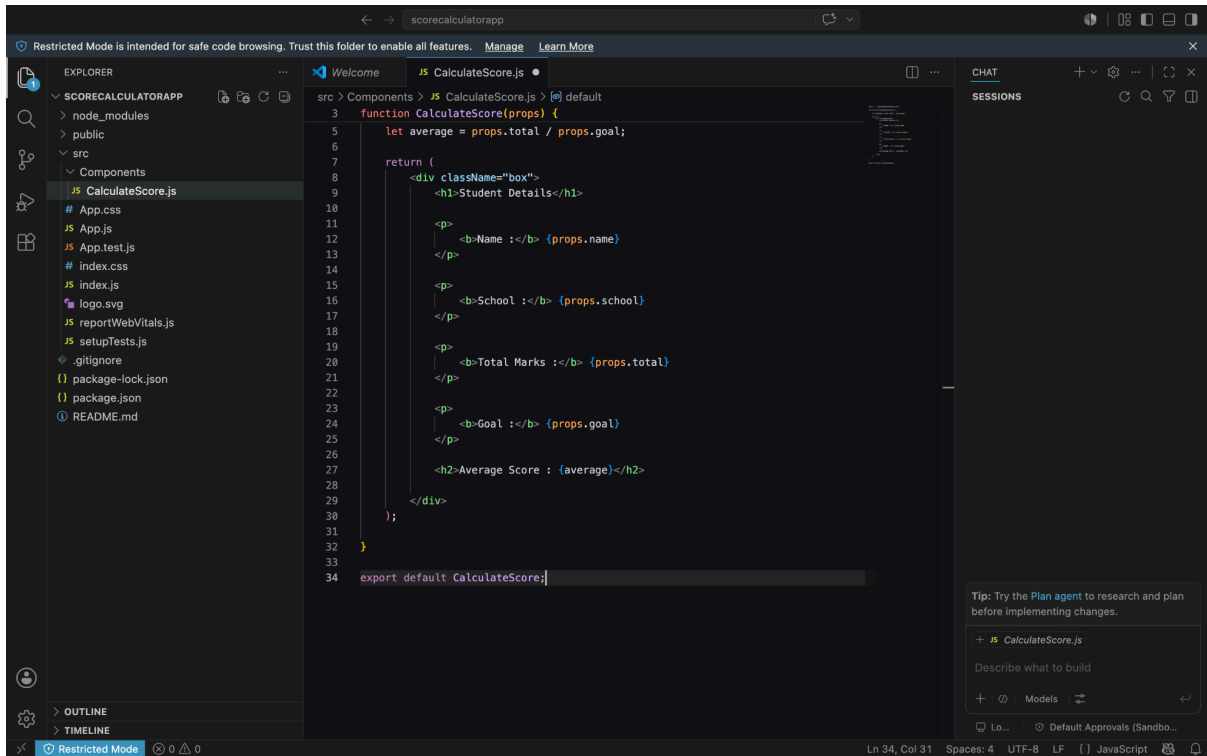

```
    <h2>Average Score : {average}</h2>
```

```
  </div>
```

```
);
```

```
}
```

export default CalculateScore;

Mystyle.css

.box{

background-color:#d9f0ff;

width:450px;

padding:25px;

margin:40px auto;

border-radius:10px;

text-align:center;

font-family:Arial;

box-shadow:0px 0px 10px gray;

}

h1{

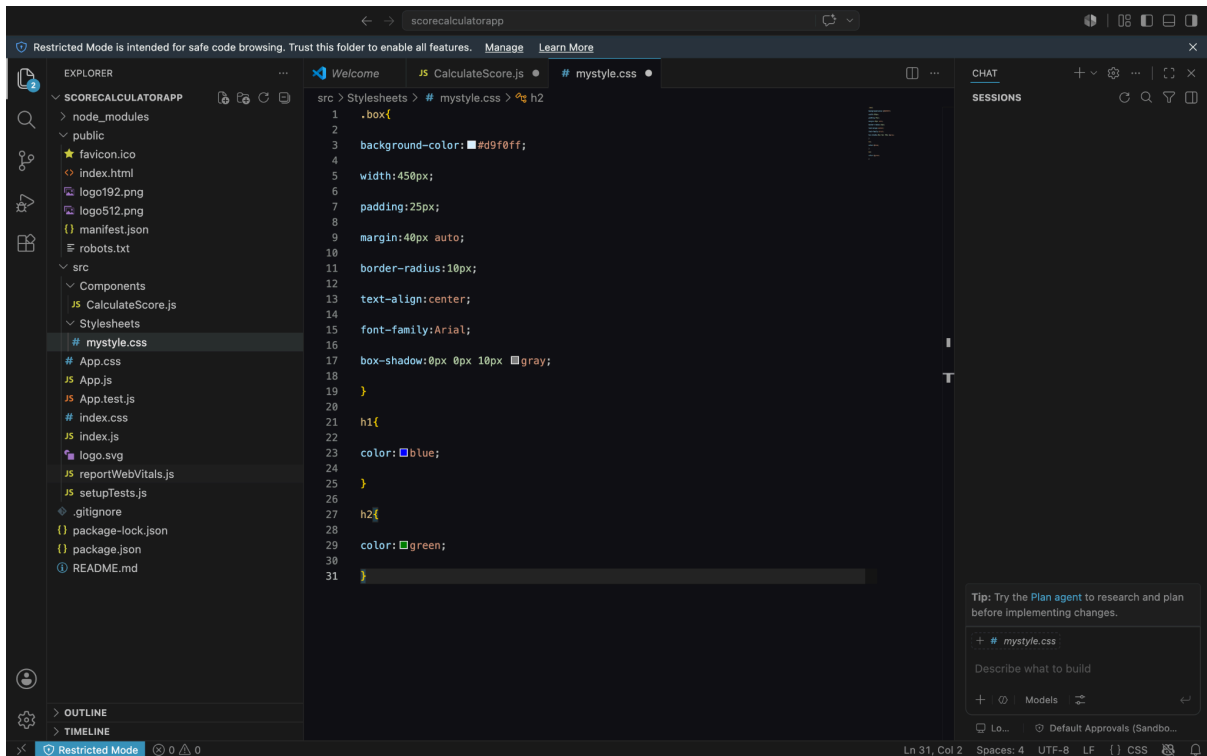

color:blue;

}

h2{

color:green;

}

App.js

import CalculateScore from
"./Components/CalculateScore";

function App() {

return (

<div>

<CalculateScore

name="Akshara Bhargava"

school="ABC Public School"

total={480}

goal={5}

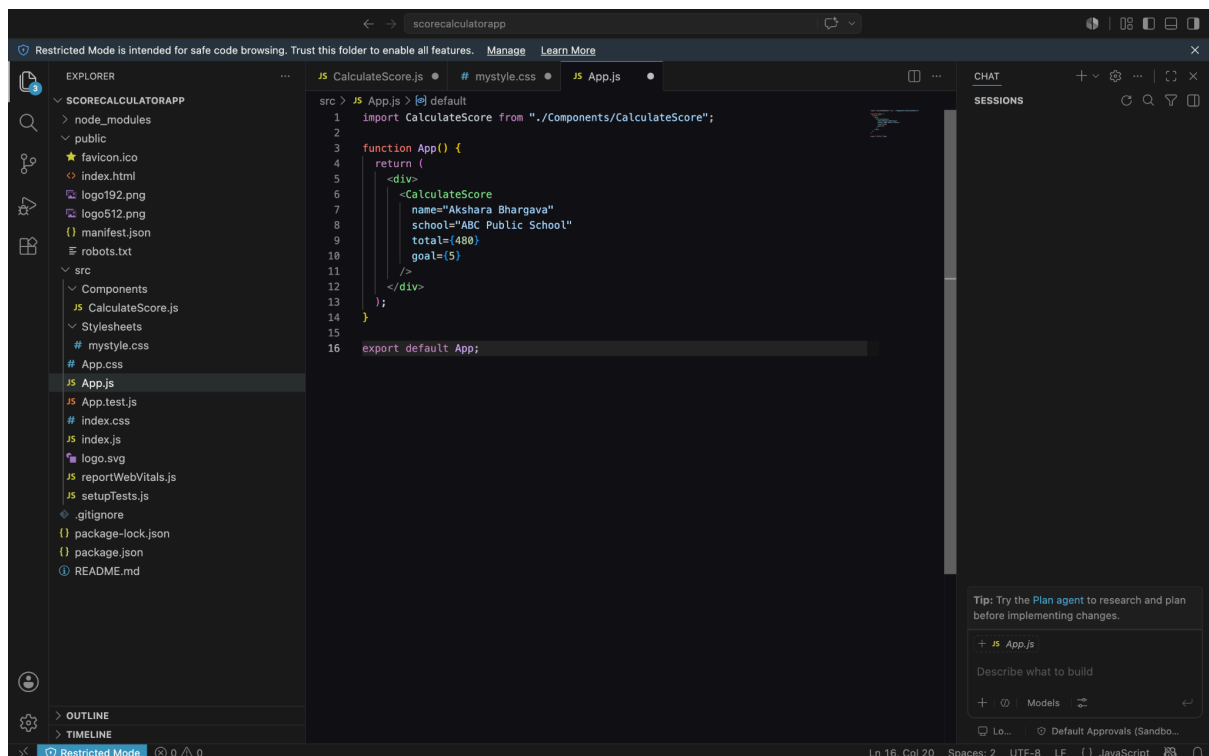

/>

</div>

);

}

export default App;

Output :

Student Details

Name :

Akshara Bhargava

School :

ABC Public School

Total Marks :

480

Goal :

5

Average Score :

96

Explanation :

- 1. Created a React project named scorecalculatorapp.**
- 2. Created a Components folder.**
- 3. Developed a functional component CalculateScore.**
- 4. Passed Name, School, Total and Goal using props.**

- 5. Calculated the average score.**
- 6. Applied CSS styling using mystyle.css.**
- 7. Rendered the component successfully.**

Result :

The Student Management Portal Score Calculator application was created successfully. The average score was calculated and displayed using React functional components and props.
