

Week 2 – ReactJS Hands-on Lab

Name : Akshara

Bhargava(aksharabhargava6@gmail.com)

Objective: To create a React application and implement reusable components (Home, About and Contact) and render them using [App.js](#).

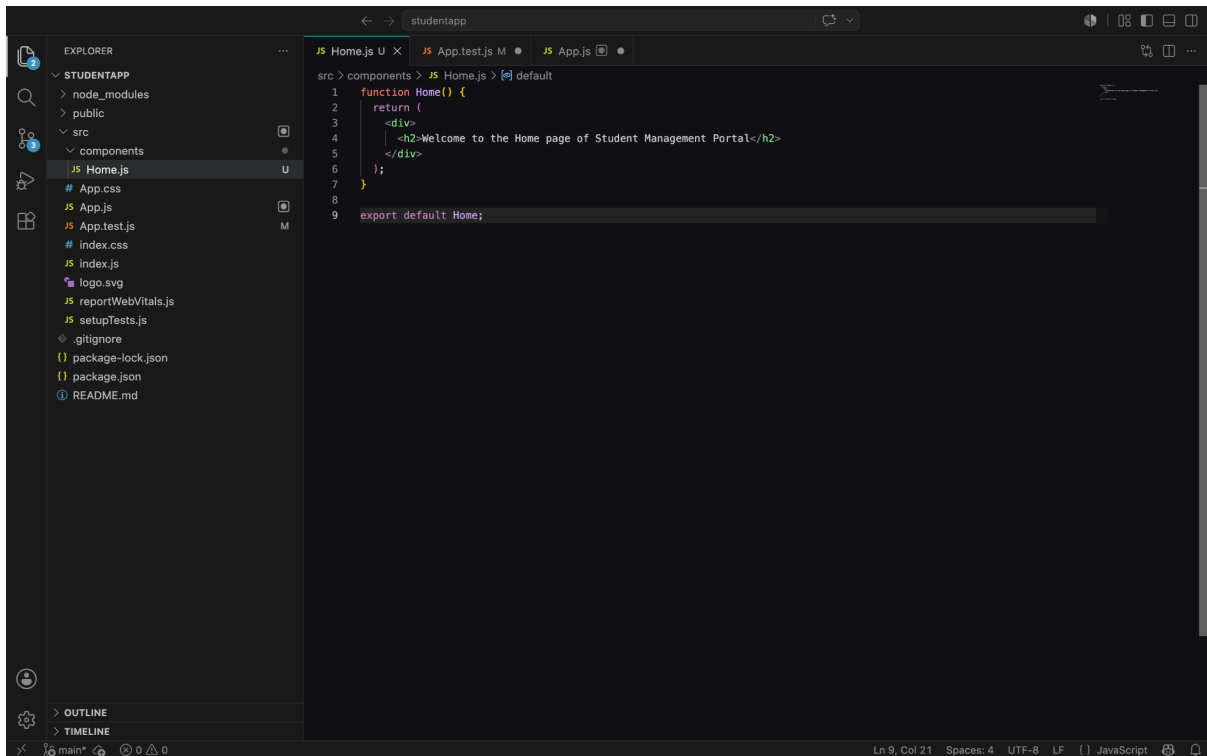

To create a React application and implement reusable components (Home, About and Contact) and render them using App.js.

To create a React application and implement reusable components (Home, About and Contact) and render them using [App.js](#).

```
Compiled successfully!  
You can now view studentapp in the browser.  
  
Local:      http://localhost:3000  
On Your Network:  http://172.25.253.225:3000  
  
Note that the development build is not optimized.  
To create a production build, use npm run build.  
  
webpack compiled successfully
```

Home Component

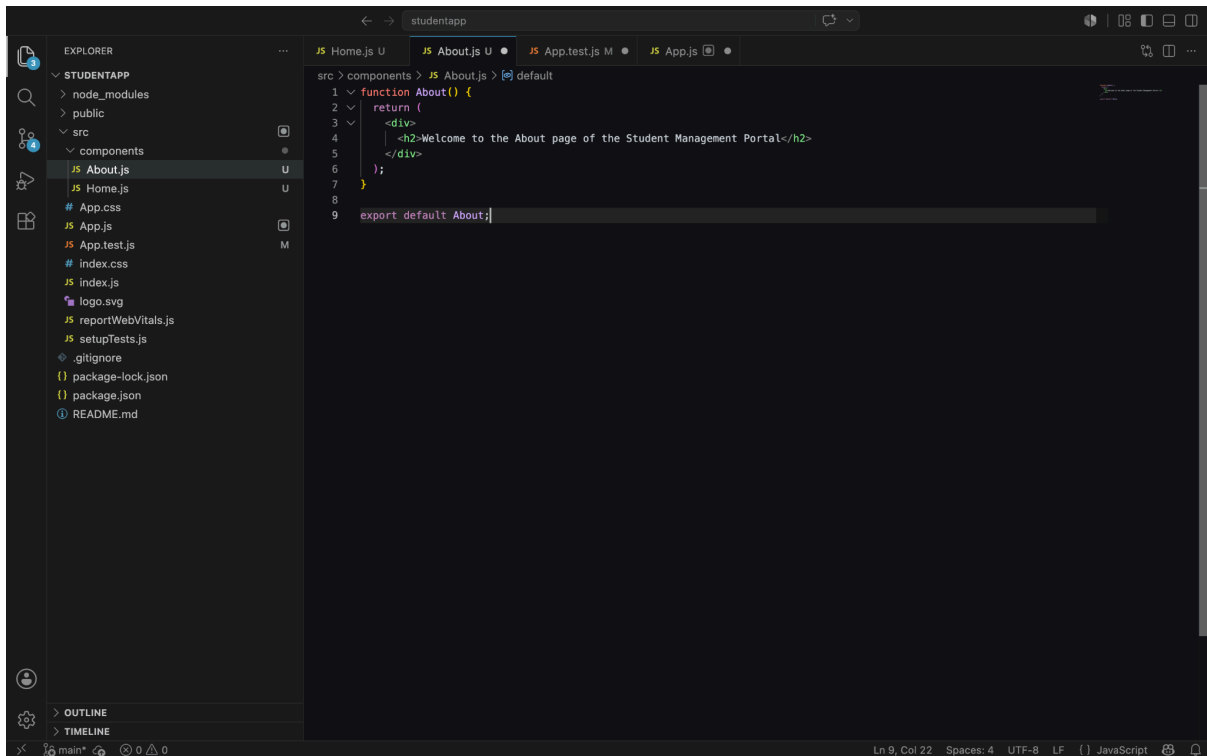

```
function Home() {  
  return (  
    <div>  
      <h2>Welcome to the Home page of Student  
Management Portal</h2>  
    </div>  
  );  
}  
  
export default Home;
```

About Component

```
function About() {  
  return (  
    <div>  
      <h2>Welcome to the About page of Student  
Management Portal</h2>  
    </div>  
  );  
}
```

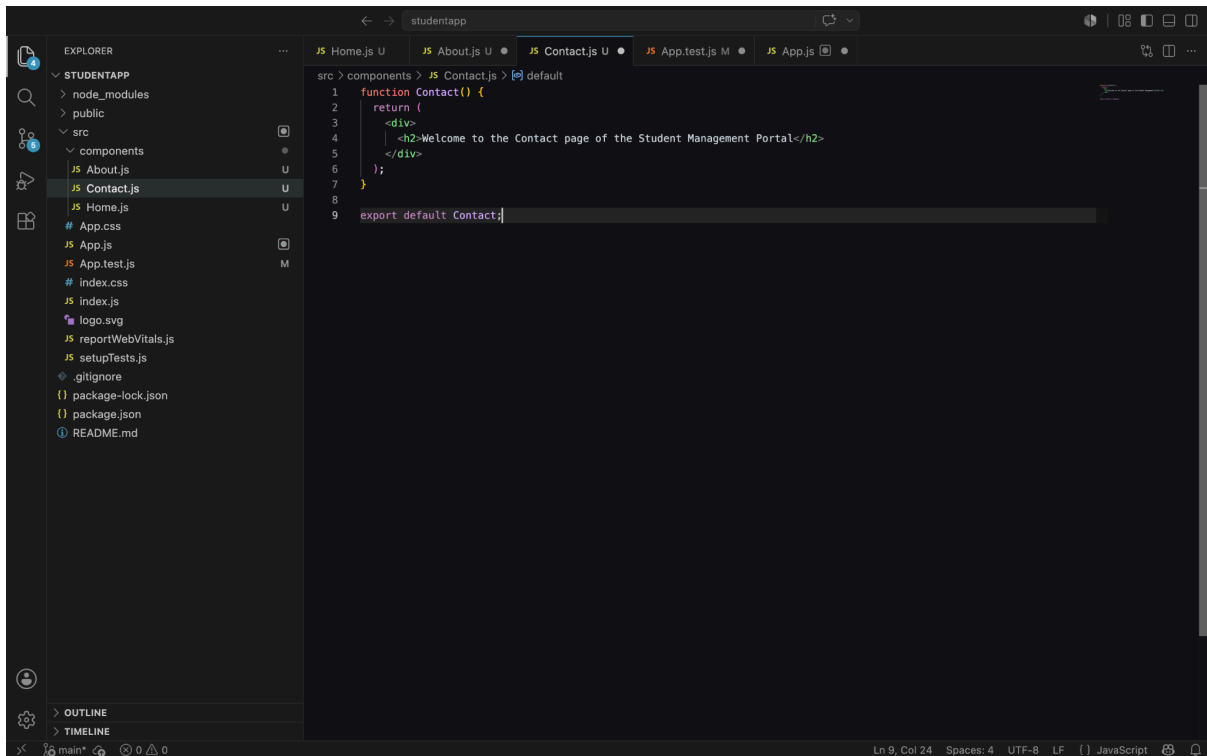

```
export default About;
```

Contact Component

```
function Contact() {  
  return (  
    <div>  
      <h2>Welcome to the Contact page of Student  
Management Portal</h2>  
    </div>  
  );  
}
```

```
export default Contact;
```

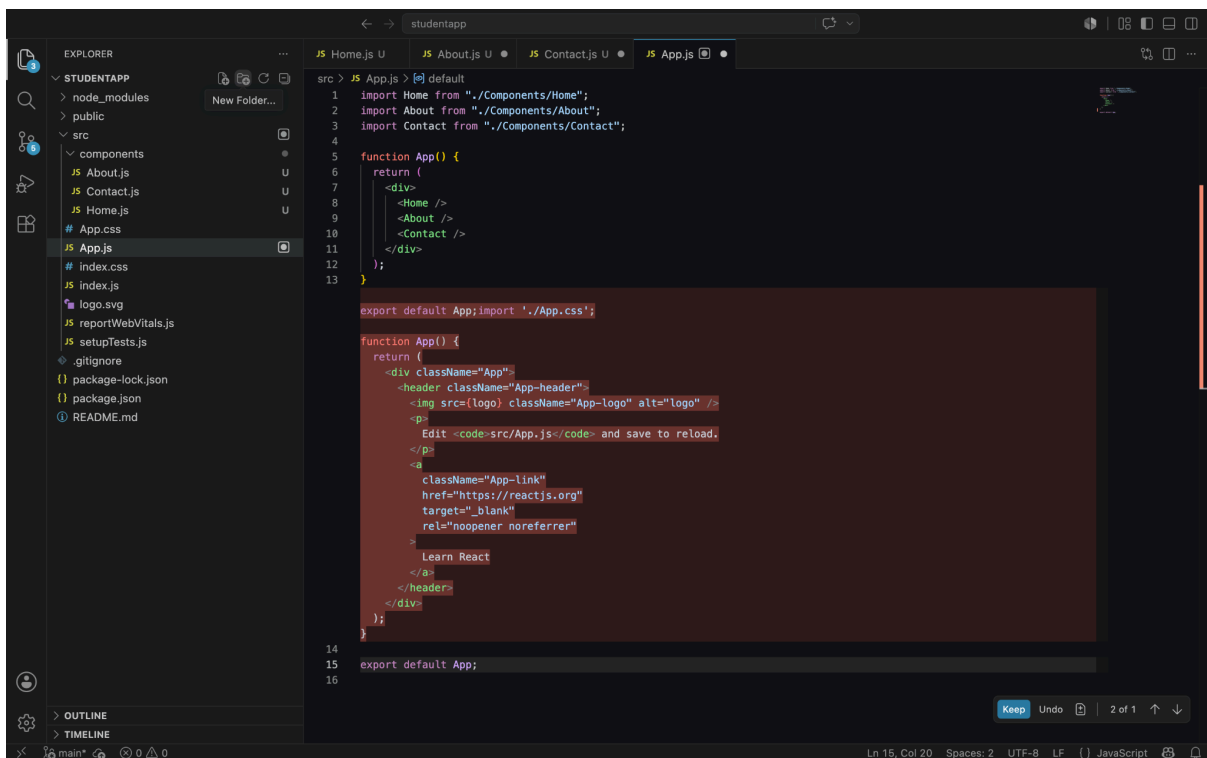

[App.js](#)

```
import Home from "./Components/Home";  
import About from "./Components/About";  
import Contact from "./Components/Contact";
```

```
function App() {  
  return (  
    <div>  
      <Home />  
      <About />  
      <Contact />  
    </div>  
  );  
}
```

export default App;

```
src > JS App.js > default
1 import Home from "../Components/Home";
2 import About from "../Components/About";
3 import Contact from "../Components/Contact";
4
5 function App() {
6   return (
7     <div>
8       <Home />
9       <About />
10      <Contact />
11    </div>
12  );
13
14
15 export default App;
16
```

```
export default App;import './App.css';

function App() {
  return (
    <div className="App">
      <header className="App-header">
        <img src={logo} className="App-logo" alt="logo" />
        <p>
          Edit <code>src/App.js</code> and save to reload.
        </p>
        <a
          className="App-link"
          href="https://reactjs.org"
          target="_blank"
          rel="noopener noreferrer"
        >
          Learn React
        </a>
      </header>
    </div>
  );
}
```

Output :

Explanation :

- 1. Created a React project using Create React App.**
- 2. Created a Components folder inside src.**
- 3. Developed three reusable components:**
 - Home**
 - About**
 - Contact**
- 4. Imported all components into App.js.**
- 5. Rendered the components successfully.**
- 6. Executed the application using npm start.**

Result :

The React application was successfully created and the Home, About and Contact components were rendered correctly.
